

### Basic Control Skills Test: Forward Line Stop

You must drive forward and stop your vehicle with your front bumper within 2 feet of the last "stop line" without touching or going past the stop line. You may stop only once, and you may not lean out the window to see better. You will be scored on the final position of your vehicle relative to the stop line.

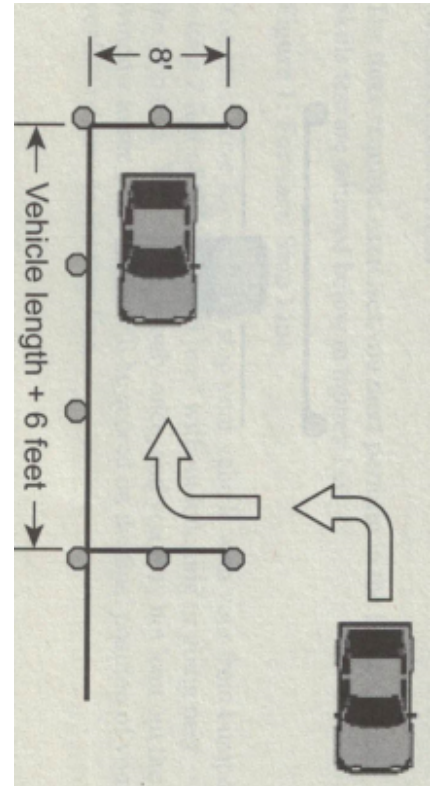

### Basic Control Skills Test: Curved path backing – sight side (Y-turn) and right turn

You must back your vehicle from a 90-degree angle into a simulated driveway. Try to back into the space without touching or crossing over either side boundary (excluding mirrors). Try to finish the exercise with the rear bumper (farthest most point) of your vehicle between the cones. Once you have finished backing, you will drive forward and turn right out of the driveway. Try not to touch or cross over any side boundaries or hit any cones as you turn right exiting the driveway.

### Basic Control Skills Test: Curved path backing – blind side (parallel parking)

You must drive by the entrance of a parking space located on the passenger side of your vehicle. You will then back your vehicle into the space. The size of the space is determined by adding 6 feet to the length of your vehicle. You must try to finish the exercise with your vehicle positioned completely within the parking space. Your vehicle does not have to be evenly centered within the front and back boundary lines. When backing, try to perform the maneuver without touching or crossing over any boundary lines or repositioning your vehicle.

## **On-the Road Test**

You must demonstrate your ability to drive safely over a predetermined route. The route will contain a variety of traffic situations including city, residential and expressway driving. At all times during the driving test, you must operate your vehicle in a safe and responsible manner, obeying all traffic laws. The examiner will observe and score you on specific maneuvers as well as on your general driving behavior. You are expected to drive straight ahead unless given instructions to turn or perform other maneuvers. The examiner will give you directions for each maneuver as far in advance as possible and will not ask you to do anything illegal or unsafe.

## **Driving Skills Test Requirements**

Although every driving test route may not be identical, each route will contain similar maneuvers that will “equalize” the difficulty of any route approved by the Michigan Department of State. Every route will attempt to contain each of the following maneuvers:

- Left turns with varying difficulty.
- Right turns with varying difficulty.
- Intersections that involve stopping and then driving straight through.
- Intersections that involve driving straight through without stopping.
- Expressway or rural highway driving (lane changes required).
- Urban and residential driving (lane changes required).
- Collision avoidance (simulated head-on collision).
- Curve.
- Railroad crossing (actual or simulated).
- Turning a fan (or radio) on and off while driving.

## **Under 18 (GDL) – Bring 5 Unexpired Documents**

- Driving log
- Level 1 license
- Segment 2 card
- Proof of Registration
- Proof of Insurance
- Parent or licensed adult 21 years or older

## **18 Years or older (TIP) – Bring 3 Unexpired Documents**

- Driving permit (must have it 30 days, or it must be stamped “waive 30 days”)
- Proof of Registration
- Proof of Insurance

## **Car Inspection – Must Work**

- Horn, speedometer, windshield wipers and washers
- All lights and turn signals, including the center back brake light
- No cracks in the windshield obstruction the view of the driver in any way
- Enough gas for one hour of testing
